

# With more people working from home, cybercrime is increasing

These days, many are working, studying, and entertaining our families from home - and relying on technology more than ever. Cyber criminals are actively looking for vulnerabilities to gain access to personal information.

## Risk

Kaitlin and Tim's children started virtual classes and were spending a lot more time online.

## Loss

When Kaitlin and Tim's daughter watched an educational video assigned for class, a malicious code made its way onto her computer. This allowed the hacker to gain access to all the information on that device, including Kaitlin and Tim's bank account information, and successfully transferred \$100,000 from their account.

## Solution

Working from home and going to school online can be stressful. Adding cyber coverage to your homeowner's policy can insure you for malicious attacks, cyberbullying, or identity theft. [Here are some other helpful tips.](#)

## Chubb Difference: Cyber protection on top of what's covered by your homeowner's policy

Kaitlin and Tim purchased an additional \$250,000 in cyber protection coverage beyond the standard \$10,000 provided in their homeowner's policy. This is a unique coverage offering that is not standard across the personal insurance industry. With this extra coverage, Kaitlin and Tim would have more easily recovered from the financial loss.

### What is the impact to you?

- With proper coverage, recovering from a cyberattack is easier and less stressful.
- Depending on your situation, your bank may not reimburse you for lost funds from a cyberattack.
- Chubb will reimburse expenses to replace lost or stolen digital property
